

Smart Growth Awards of Excellence

The awards program was established by the Smart Growth Education Foundation through its Coalition Committee. The awards program is designed to recognize those builders, developers, and community organizations that follow smart growth principles in building housing in both urban and suburban locations.

The winners are chosen from entries representing an 11-county area of Northeast Ohio on the basis of the development's land conservation, environmental sensitivity, use of infrastructure, housing choices, community character, transportation accessibility, economic viability and overall design.
